Re: how to list of Groups on ubuntu server

Code:

cat /etc/group

will list all the groups, including ones used only by the system. Just typing

Code:

groups

will list all the groups of which the current user is a member. To add a user use

Code:

sudo useradd name

To add a user to a specific group use

Code:

sudo usermod -G name-of-group -a 'name-of-user'

For more information on all these -- and it's really a good idea to make sure you know what you're doing before doing system-level commands -- you can type
